AGRICULTURAL STATISTICS, IRELAND,

1906.

TO THE

SECRETARY OF THE DEPARTMENT OF AGRICULTURE AND TECHNICAL INSTRUCTION FOR IRELAND.

SIR,

I have the honour to submit the Annual General Abstracts of Agricultural Statistics for Ireland, which give, by Counties and Provinces, the acreage under Crops, and the number and description of Live Stock in Ireland in 1906.

It should be stated that in order to make public at the earliest date the information obtained, the figures presented in this return are unrevised. They may be considered, however, to be substantially correct. As soon as is possible a revised return will be issued together with the estimated yield of crops.

The following summary table shows the areas of land in 1905 and 1906 under the chief heads of classification:—

PROVINCES.	Corn and Green Crops including Flax.	Hay.	Pasture.	Mountain Land Grazed.	Fruit and Fallow.	Woods and Plantations.	Barren Mountain Land, Turf Bog, Marsh, and Land used for Buildings, Roads, Fences, and under Water.	Total.

* Pasture. The decrease shown in column 3—Pasture—is chiefly due to certain areas of land now returned as "grazed Mountain Land." The net decrease in the area of "pasture" appears to be approximately 75,000 acres.

† Mountain Land, Grazed Mountain Land—column 4—and "Barren" Mountain (see column 7) were not distinguished in the returns prior to 1906.

The year 1906 marks an increase in the tillage area in Leinster, Munster, and Ulster. The increase is most marked in the case of Leinster. There is also a considerable increase in Munster and Ulster. In Connaught, while there is an increase in the area under corn crops, the falling off in the area of root and green crops leaves a net decrease in that province of 752 acres in the area of corn and green crops, including flax.

CEREAL CROPS.

Wheat.—The area of wheat is returned as 43,888 acres, an increase of 6,028 acres on 1905. The increase in area has taken place in all the four provinces, but chiefly in Leinster and Munster. The increase amounts in Leinster to 2,659 acres and in Munster to 1,866 acres.

Oats.—The area of oats is returned as 1,076,281 acres, an increase of 9,475 acres on 1905. The increase in Ulster amounts to 7,373 acres. There is also a small increase in each of the other provinces.

Barley.—The area of barley is returned as 176,410 acres, an increase of 21,821 acres on 1905. The increase has taken place in all the provinces, but especially in Leinster and Munster, in which provinces 96 per cent. of the barley in Ireland is grown. The increase amounts to 15,814 acres in Leinster, and in Munster to 4,029 acres.

Minor Corn Crops.—The other corn crops also show an increase in 1906, bere of 54 acres, rye of 181 acres, beans of 488 acres, and pease of 48 acres.

GREEN CROPS.

Potatoes.—The area of potatoes is returned as 616,097—a decrease of 658 acres on 1905. There is a decrease in Munster of 1,070 acres, in Ulster of 1,611 acres, and in Connaught of 683 acres. In Leinster there is an increase amounting to 2,706 acres.

Turnips.—The area of turnips is returned as 278,343 acres—a decrease of 3,762 acres on 1905. A small increase in the area of turnips is recorded both in Leinster and Munster, while in Connaught there is a decrease of 470 acres. In Ulster, there is a falling off recorded from all counties amounting to a total decrease for the province of 3,817 acres.

Mangels.—The area of mangels is returned as 67,190—a decrease of 5,380 acres. The decrease is especially marked, proportionately to the area grown, in Ulster and Connaught.

Cabbage.—The area of cabbage is returned as 40,820 acres, a decrease of 1,875 acres. This decrease has taken place chiefly in Munster and Connaught.

Minor Green Crops.—There is an increase in parsnips of 99 acres, in vetches of 56 acres, in rape of 572 acres. There is a decrease in beet-root of 4 acres, and in carrots of 25 acres. "Other green crops," i.e., such as are not specified among the foregoing, have increased by 271 acres.

The following statements show the area under each crop in 1905 and 1906 respectively, with the increase or decrease in the latter year:—

Flax.—The area of flax has increased by 9,013 acres.

HAY.

The area under hay is returned as 2,328,958 acres, an increase of 34,452 acres in 1905. Nearly half of this increase has taken place in Leinster. There is also a considerable increase in Ulster and in Munster. In Connaught the area of hay is almost the same as it was in 1905, showing a slight decrease. In the 1906 returns hay has been classified so as to show the amount of first year hay, second and thirds years' hay, and hay from permanent meadow, which class includes "all other hay." First year hay amounts to 522,349 acres, second and third years' hay to 257,894 acres, and hay from permanent meadow to 1,548,715 acres.

The following table summarises the acreage of Cereal and Green Crops, Flax, and Hay in 1905 and 1906 :—

Net Increase in the Area of Land under Crops in 1906, 70,854 Acres.				

Grass and Pasture.—The area of pasture, as shown in column 3 of the table on page 3, is returned as amounting to 10,064,807 acres. In addition to this there is the mountain land, returned as grazed, namely, 2,244,708 acres, giving a total of 12,309,515 acres. It would appear that there has been a decrease of pasture amounting to approximately 75,000 acres.

The following Summaries show the main changes in the crop areas of the several provinces :—

Leinster.

In Leinster there has been an increase of corn crops amounting to 19,685 acres—the greatest increase being in barley and wheat. There has also been an increase in root and green crops amounting to 3,218 acres—this increase being chiefly in the area of potatoes. The area of hay has also increased by 16,258 acres. There is a total increase in Leinster in the area of crops amounting to 39,143 acres.

Munster.

In Munster corn crops have increased by 6,130 acres—the increase being chiefly in wheat and barley. In root and green crops there is a decrease of 3,659 acres—chiefly due to the decreased area of potatoes and mangel wurzel. There is thus a

net increase of corn and green crops of 2,471 acres. There is also an increase in the area of hay amounting to 6,771 acres. The total increase in the area of crops in 1906 amounts to in Munster 9,242 acres.

Ulster.

In Ulster there is an increase in corn crops of 9,950 acres, the increase being considerable alike in wheat, oats, and barley. In green crops there is a decrease of 7,199 acres, chiefly due to the decline of turnips and mangels, and to a less extent of potatoes. There is an increase of 9,047 acres of flax. The total area of corn and green crops, including flax, has increased by 11,798 acres. The area of hay has increased by 11,696 acres. The total area of crops has thus increased by 23,494 acres.

Connaught.

In Connaught there has been an increase in corn crops of 2,330 acres, this increase taking place alike in wheat, oats, and barley. On the other hand the area of green crops—including flax—has decreased by 3,082, the falling off having been chiefly in mangels and cabbage, and to a less extent in potatoes. The total area of corn and green crops, including flax, has thus decreased by 752 acres. There is also a decrease in the area of hay amounting to 273 acres. The total decline in the area of crops in Connaught thus amounts to 1,025 acres.

The following table shows the acreage of the several cereal and green crops, and of flax and hay during each of the past five years:—
